

FLEXtrac for Access and Management of Your Lease Assets

Nexcap's FLEXtrac product is a customized online inventory management and administration application that allows you to track, monitor and manage all of your leased assets and their associated costs. FLEXtrac provides you with access to all of your pertinent data on your equipment leases and assets, as well as the ability to extract data and download to software applications at your desktop.

How Can FLEXtrac Help?

Need to know your monthly leasing costs? Wondering when your leases will be wrapping up? Want access to a summary of assets that have been acquired through lease arrangements?

The FLEXtrac application brings lease transparency and detail to your desktop. Summaries of all leases, lease expiry dates, asset descriptions, costs and much more are available whenever you need them – and since data is updated daily, you'll always have relevant information at your fingertips. FLEXtrac is simple to use, secure, and designed to meet your data requirements.

You'll Benefit With FLEXtrac

DATA TRANSPARENCY – All of your leasing information is available online, at any time, including your scanned lease documentation.

DATA INTEGRITY – Your information is updated daily, giving you the relevant detail you require.

DATA INTEGRATION – Access per lease asset costs and other data that can be easily downloaded into your internal asset management system or Excel spreadsheets.

DATA SECURITY – The password-protected web interface means your data is safe.

SIMPLIFIED PLANNING, BUDGETING AND TRACKING – All the FLEXtrac data and reports available to you assists with product lifecycle planning and budgeting, and keeps all of the information organized.

EASE OF USE – FLEXtrac is simple to use; just choose the data you want and export it to Excel or to your internal asset management system, view copies of your signed documents, and get a status check on the equipment you have accumulating on FLEXline for subsequent lease.

REDUCED ADMINISTRATION COSTS – With the data access and integration provided by FLEXtrac, you can spend less time tracking down critical information for your internal reporting requirements.

EXPLORE OPTIONS – FLEXtrac allows you to analyse costs and define your options, which is valuable when considering upgrades or replacement of your assets.

Frequently Asked Questions

How up-to-date is the FLEXtrac data?

FLEXtrac data is updated daily.

What software do I need to use FLEXtrac?

As a web-based application, there is no additional software required. If you wish to download and manipulate the data, you should have Microsoft Excel on your desktop.

Does FLEXtrac keep track of location and user related information?

Location codes and or billing information can be captured at time of equipment acceptance, assisting with cost allocations. Current location and user information can be kept up-to-date if an interface is established between FLEXtrac and your internal database(s).

How much does FLEXtrac cost?

FLEXtrac is a basic and free service provided as an integral part of Nexcap's complete transparent leasing solutions. Customization and data interfacing may involve additional charges.

This is sensitive information – is it secure?

You'll be given a password for entering the FLEXtrac system, so that only you have access to your organization's leasing data.

Can FLEXtrac data be integrated into our internal asset management system?

Definitely. Data can be easily downloaded and correlated through serial numbers, tracking codes or otherwise.

Can FLEXtrac data be sorted according to serial number, equipment type or other parameters online?

Yes. By simply clicking on the column heading for the desired parameter, the report will be automatically reorganized accordingly.

Partnering with Nexcap

To implement the FLEXtrac solution in your business, or to learn more about Nexcap's transparent lease offerings, please contact your local Nexcap representative. We have locations across Canada to serve you better.
